Step 1: any size square paper or very light weight cardstock that doesn't crack when folded. I used 12" x 12" - Can be patterned one side or both or just plain paper. Fold in half, then fold each half in half again. Turn paper 90° and repeat folding in half.

Step 2: Cut along solid line, following the crease lines, keeping the center drop out piece for circle inserts and tags

Step 3: Fold accordian style, starting with a mountain fold on the right side leg.

Step 4: Creating the triangle for circle pockets - With the center mountain fold facing you, fold the corner section and the square below it with mountain folds and fold them to the back of the accordian. Adhere to backside. Repeat on left side.  
**Note:** If you are using patterned paper, you should end up having the same pattern facing the front. Place a very thin line of glue along the bottom edge and back edge of triangle, press together to adhere creating the triangle pocket. The bottom 2 squares on each leg will also be adhered with a very thin line of glue along the bottom and back edge (the 2 open edges) to create the tag pocket.

Step 5: **Cutting the circles** - 6.6mm w (Spellbinders Standard Circles Small set) from the drop out piece. Note any circle that is smaller than the scored square of the paper should fit the pocket. Cut a 2nd circle from white paper or cardstock slightly smaller (Spellbinders Standard Circles Large set). After decorating or stamping on the white piece, adhere to patterned piece with glue all over and especially around the edges.

Step 6: **Cutting the tags** - Cut the tag from the drop out pieces within the score lines. Check to make sure it fits in to your pocket, trim down if necessary. Cut a piece of white cardstock, slightly smaller. Adhere to patterned piece. Punch hole and insert with ribbon.

Step 7: **Cutting the quote squares** - Cut 4 pieces slightly smaller than your folded squares approx 7mm square (2.7" square). Decorate and then adhere to accordion.

Step 8: **Attaching accordion to card base**: Score and fold your card (5.5"w x 5.5"h). Do all your stamping and decorating prior attaching the accordion. Make sure that when your accordion is completely folded, the triangle pieces don't stick out from between the folds, or else adjust how you adhere it to your card base. Apply double sided adhesive to back of one side of the tag pocket. Press down on inside of card. Note: I like leaving a scant border. Apply the tape on the other tag pocket end, stack the accordion closed, then close the card to adhere.
